MMPIC Training and Philosophy

Welcome to the Mid-Michigan Psychology Internship Consortium (MMPIC) pre-doctoral psychology internship. MMPIC includes faculty from Michigan State University, Central Michigan University, and the University of Michigan. The five MMPIC sites are:

- **Ingham Intermediate School District** (Mason, MI)
- **Psychology Internship in Integrated Behavioral Health and Pediatric Psychology**, housed in Michigan Medicine, Department of Pediatrics and Communicable Diseases, Division of Pediatric Psychology (Ann Arbor, MI)
- **Saginaw Public Schools** (Saginaw, MI)
- **Sunfield Center for Autism, ADHD and Behavioral Health** (Ann Arbor, MI)
- **Thriving Minds Behavioral Health Center** (Brighton, MI)

The mission of the Mid-Michigan Psychology Internship Consortium is to train scientist-scholar-practitioners who conceptualize their work with children, adolescents, and transition age students from an ecological systems perspective. MMPIC offers intensive, structured training experiences with a this diverse population at the individual, family, school, and systems-level by consulting and collaborating with caregivers, family members, school professionals, medical professionals, and other important stakeholders to support client care. MMPIC values evidence-based practices that take into consideration individual, cultural, ethnic, and societal differences. Interns are trained to engage in scholarly inquiry and are expected to apply learned knowledge in their clinical practice.

MMPIC is defined by its commitment to offering a well-rounded, comprehensive, and unified training program. Interns apply for and are admitted to individual sites, though all sites are under the same leadership. Interns are a part of a larger consortium cohort across all participating sites. While intern responsibilities and supervision are coordinated at individual sites, interns attend seminars, case consultation, and didactic training together as a cohort at all five sites and at Michigan State University. As a result, all interns develop competencies and deep understanding of assessment, intervention, and consultation within an ecological framework, though their daily activities may vary considerably from site to site.

The consortium accepts applicants from school and clinical psychology doctoral programs, and preference is given to interns from APA-accredited programs. Only interns from school psychology programs are considered for the Ingham Intermediate School District and Saginaw Public Schools sites.

MMPIC is currently aligned with CDSPP training standards.
**Nature of the Internship**

**Training Term**
The internship program is **one full year (12 months/2000 hours)** in duration. The term of the internship program is from **August 15th to August 14th** each year. Interns are expected to accrue approximately 40 hours per week across a full year.

**Structure of Internship**
MMPIC interns are placed in one internship site and remain at that site across the whole year. Interns do not rotate through all five consortium internship sites. The internship consortium has a non-affiliated, independent training structure. Michigan State University has been instrumental in developing the internship, has been and will be an ongoing resource, and will continue to provide administrative support to the internship consortium. Faculty from Central Michigan University and the University of Michigan also provide support. The internship is a culminating experience that serves to integrate fieldwork training and academic preparation. The structure of the internship schedule ensures that intern training requirements take precedence over service delivery and revenue generation. To that end, all consortium sites have agreed to protect one day a week in intern schedules for didactic trainings, supervision, and time for interns to complete their dissertations or other research projects.

**Internship Activities**
Interns engage in various activities related to assessment, intervention, and consultation in academic, behavioral, psychological, and social-emotional domains. **Interns spend at least 25% of their time engaging in direct service provision for children, youth, and families.**

Interns also attend didactic trainings as a cohort. Trainings rotate among sites and are led by licensed psychologists and MSU faculty. This rotating didactic schedule remains in place even if an individual site does not have an intern on-site for a given year. Travel from any internship site to the location of a didactic training location does not exceed 69 miles.

**Commitment to Excellence in Training**
The consortium’s affiliation with Michigan State University, Central Michigan University, and Michigan Medicine at the University of Michigan maintains the training emphasis. Dr. Aupperlee, training co-director, is the Clinical Assistant Professor at Michigan State University, and the other training co-director, Dr. Barrett, has trained students across university- and systems-level positions. All recruited consortium sites have demonstrated their commitment to collaborative, high-quality training over time and they all have a history of valuing students, providing strong supervision, and fostering high intern satisfaction. The consortium supervisors are committed to having interns develop competence across domains. So, rather than interns only completing revenue-generating activities, interns develop their competencies through a broad array of carefully-supervised activities.
Patient and Client Population

The MMPIC is committed to the value of diversity and the richness of human differences. To that end, the service and training mission of the consortium requires that the interns serve clients and families of all backgrounds with respectful, culturally-appropriate treatment and service. Interns benefit from the perspectives of clients, families, and other professionals who differ from themselves in terms of gender, ethnicity, race, culture, sexual orientation, age, religious beliefs, socio-economic class, and abilities. Thus, the consortium’s policies and procedures, as well as its activities, associations, and interactions with the community, reflect and promote the dignity and worth of the individual and the value and strength of diversity in the community.

At Ingham ISD, interns serve students ages 3 to 26 in a preschool through transitional setting at twelve public school districts in Ingham County and residing in urban, suburban, and rural settings. Interns support the learning of all students through the provision of academic, behavioral, and social-emotional supports and services. As a part of a school- or district-level multidisciplinary team, interns also participate in systems-level decision-making and programming for all students in the district, including those who qualify for special education within various eligibility categories, including cognitive impairment, emotional impairment, speech and language impairment, early childhood developmental delay, specific learning disability, severe multiple impairment, and autism spectrum disorder. According to U.S. Census data from 2015, residents of Ingham County report identifying as follows: White (70.6%), Black/African American (12.3%), Hispanic/Latino (7.7%), Asian (6.5%), Multiracial (3.8%), American Indian/Alaska Native (0.6%), Native Hawaiian/Other Pacific Islander (0.1%).

Saginaw Public Schools is an urban school district educating approximately 7,500 students in 10 elementary schools, 1 middle school, and 3 high schools. Interns gain experience in consultation and evaluation, empirically-supported individual and/or group therapy and intervention, and crisis intervention to support children and adolescents with a variety of needs. Client needs include specific learning disabilities, developmental disabilities, physical disabilities, serious mental illness, or internalizing disorders. The U.S. Census data from 2016 reports the following racial/ethnic demographics for Saginaw County, Michigan: White (76.4%), Black/African American (19.4%), Hispanic/Latino (8.4%), Asian (1.4%), Multiracial (2.2%), American Indian/Alaska Native (0.6%), Native Hawaiian/Other Pacific Islander (0.1%).

At Thriving Minds, Sunfield Center, and Michigan Medicine interns serve diverse children and families across Mid-Michigan and Eastern Michigan, including clients from urban, suburban, and rural settings in the Ann Arbor, Flint, and Detroit metropolitan areas and from nearby states. Interns provide services to children and adolescents with a variety of internalizing behaviors, externalizing behaviors, learning needs, and developmental differences. Presenting concerns include anxiety disorders, depressive disorders, tic disorder, obsessive-compulsive disorder, post-traumatic stress disorder, selective mutism, oppositional defiant disorder, attention deficit/hyperactivity disorder, learning disorders, working memory deficits, dyslexia, autism spectrum disorders, speech and language delays, or challenges adapting to illness.
Supervision and Evaluation

Individual Supervision of Interns

Supervision of interns is aligned with the APPIC and APA expectations for internship supervision. Intern supervision is provided by site staff members who carry clinical responsibility for all supervised cases. Supervision guides psychological services rendered directly by the intern. Required supervision hours are provided through face-to-face individual supervision. Each intern receives at least two hours a week of face-to-face, individual supervision by a psychologist licensed in Michigan.

Each intern also receives an additional two hours of weekly group supervision by a licensed psychologist. Total supervision time must include 100 hours of individual supervision with a licensed psychologist plus an additional 100 hours of supervision with a licensed psychologist. MMPIC trainers believe that supervisor accessibility is an important component of a good training program. We therefore ensure that supervisors are available to answer questions and meet the needs of interns outside of their regularly scheduled supervision.

Group Supervision of Interns

MMPIC shares resources and has coordinated training activities. MMPIC supports supervision and training for all interns and offers a monthly training seminar, referred to as MMPIC group supervision and training. Attendance at MMPIC group supervision and training is mandatory for all interns. Didactic training on specific topics is offered by licensed psychologists. Group supervision activities include seminars, ethical vignettes, and didactic training. Interns also engage in presentations and peer supervision.

In addition to the weekly individual supervision, additional supervision, and regularly scheduled group supervision and training, interns may also attend training offered by the various participating agencies. Additional training opportunities will be posted on the MMPIC listserv.

In addition to the face-to-face didactic training, interns will also have access to an online discussion forum designed to facilitate ongoing communication among trainees. This forum will be housed within Michigan State University’s Desire2Learn (D2L) online course and community system to provide interns with opportunities for collaborative problem-solving, case conceptualization, and social support as a cohort on a password-protected platform.

Finally, interns are invited to meet for social gatherings hosted by one of the training directors in the early fall and in the spring.
Evaluation of Interns
Interns are provided formative feedback at least four times during the internship year. Each intern receives informal verbal feedback, discussion, and a short written paragraph twice a year. Each intern also receives formal written evaluation twice a year. Specifically, supervisors complete a formal evaluation form aligned with MMPIC aims and competencies. These data are aggregated by the training director and shared with supervisors.

MMPIC Expectations for Intern Performance

Expectations and Hours
In order to successfully complete the internship, the following criteria must be met:
- Total training time must include at least 2000 hours.
- Direct service time must include at least 500 hours.
- Total supervision time must include 100 hours of individual supervision with a licensed psychologist plus an additional 100 hours of supervision with a licensed psychologist.
- All client records, paperwork, and work products must be complete and reviewed with supervisors before the end of internship.

Completion Criteria
- Competency-based evaluations must indicate that the intern’s performance is commensurate with performance expected of an entry-level health service psychologist.
- By the mid-year evaluation, interns are expected to receive scores of 2 (Needs Improvement) or higher in all areas on the Intern Evaluation.
- By the end of the internship, interns are expected to receive scores of 3 (Satisfactory) or higher in all areas on the Intern Evaluation.
- Intern must meet site supervisor and training director expectations for successful completion of assessment, intervention, and consultation projects.

Continuous Program Improvement
To ensure continuous program improvement, training directors review intern outcomes and products to ensure intern performance meets the aims and expectations of the program. Interns also provide feedback about the internship activities they complete and the supervision they receive, and this information is used to promote growth over time. Specifically, the training director gathers intern satisfaction data on training sites twice a year using the Intern Evaluation of Training. Should intern satisfaction data reflect low scores at a site, the training director will seek additional intern feedback, and will then work with the site to address the mismatch in expectations.
Training Resources

Resources for Interns
Interns have access to all resources available at their respective intern site. Resources include available facilities, office space, printing, scanning, and copying tools, shared clerical support, and the academic, psychological, social, and emotional assessments necessary for completing internship responsibilities.

Site Facilities
Each consortium provides adequate facilities to accommodate interns and their learning activities. Additionally, all agencies agree to administering and implementing the program’s training principles, policies, and procedures addressing intern admission, financial support, training resources, supervisor access and supervision, mid- and end-of-year performance evaluations, and expectations as defined by the MMPIC consortium agreement and handbook. Sites commit to intern activities and learning to ensure the success of each intern.

Administration
The consortium training directors and supervisors meet regularly and at least four times per year. A schedule of meeting dates, agenda, and minutes is kept by the training co-director. The trainers meet to discuss issues pertaining to the internship training program and to ensure the quality and integrity of the training program, review interns, and sites, and vote on policy. A psychologist supervisor from each agency should attend each meeting; however, given the time requirements associated with the travel distance between internship locations, teleconference attendance may sometimes be a feasible solution, but only when absolutely necessary. In addition to the need to meet face-to-face the training director and supervisors are in frequent contact via site visits, e-mail, phone, or through teleconferencing.

Communication with Other Agencies
An MMPIC training director informs APPIC of all changes to MMPIC sites and interns. An MMPIC training director also reports on all interns’ completion of internship experiences to interns’ graduate programs. An MMPIC training director completes all internship verification hours to psychology licensing boards for all members on behalf of interns.
Internship Requirements

Goals
Each intern writes three to five concrete, data-based goals to guide his or her work each semester. Interns should include at least one exposure goal and at least one affective goal in each goal document. This document is shared with all supervisors and is reviewed regularly to ensure alignment between intern expectations and opportunities.

Supervisor Evaluation and Activity Logs
A copy of the Intern Evaluation Form is located in the Appendix of the Intern Handbook. Evaluation forms must be signed, completed in full, and submitted per Handbook deadlines. Intern activity logs should be attached to evaluation forms at the time of submission. Documenting internship hours and experiences is important in planning professional development, applying for professional credentials, and monitoring progress in meeting self-identified goals. Each intern is asked to keep a weekly log of internship hours including supervision, activities, cases, workshops, client characteristics, and assessment tools.

Participation
Interns must come to supervision prepared to discuss required reading material, professional issues, and professional development. Active participation in supervision includes volunteering during discussions, attentive listening, appropriate technology use, and thoughtful, critical analysis of internship content and field experiences.

Case Presentations
In December and June, each intern will complete a formal presentation on one of their projects in assessment, intervention, or consultation. This project should be largely or fully complete. Interns should ask the cohort at least one question during the presentation. Presentations should last 15 to 20 minutes, including any discussion.
Content of Internship Training

Culturally Competent Training

The MMPIC trainers are committed to the value of diversity and the richness of human differences. Our service and training mission requires that the consortium serve people of all backgrounds with the expectation of respectful, culturally-appropriate treatment and service. In particular, the consortium recognizes that stereotypes, prejudice, and discrimination have affected training and programming practices in the mental health field. We believe that we benefit from the perspectives of those who differ by gender, ethnicity, race, culture, sexual orientation, age, religious beliefs, socio-economic class, and varying abilities. Thus, the consortium’s policies and procedures, as well as its activities, associations, and interactions with the community, reflect and promote the dignity and worth of the individual and the value and strength of diversity in the community. We encourage diverse individuals to apply to our program and seek out opportunities to serve diverse clients and systems.

We believe professionals become culturally competent through carefully structured experiences with people who differ with regards to gender, ethnicity, race, culture, sexual orientation, age, religious beliefs, socio-economic class, and abilities. We begin our diversity training by having interns reflect on their own perspectives, beliefs, and privilege, since nearly all our interactions as psychologists have cross-cultural components. Next, we offer interns structured didactic trainings including readings and videos on topics related to diversity. Interns are required to participate in reflection activities with their intern cohort. We also encourage interns to seek out assessment, intervention, and consultation activities with diverse clients and professionals.

MMPIC has taken steps to help our interns gain experiences with diverse clients and professionals. Our curriculum aimed to cultivate cultural competence includes:

- **Training Seminars**: Interns attend trainings where they receive didactic instruction in diversity topics. Beginning at orientation, training supervisors engage in discussion regarding power differentials and discuss differences related to language, race and ethnicity, and LGBTQ status in professional settings as well as in service delivery.

- **Assigned Readings**: Interns prepare for trainings by reading articles on diversity topics.

- **Supervision**: Supervisors reflect on the process of cross-cultural supervision and help interns critically examine how culture influences their interactions with clients.

<tr>
<td>Produce entry-level health service psychologists who demonstrate behavior and comportment that reflect the values and attitudes of psychology.</td>
<td>Interns will demonstrate understanding and adherence to the parameters of professional conduct for clinical psychologists, including: showing integrity, deportment, accountability, and concern for the welfare as others, all of which form their professional identity.</td>
<td></td>
</tr>
</tbody>
</table>
### Aim 3. Research and Inquiry: To prepare entry-level health service psychologists who effectively consume, produce, and disseminate research.

#### 3.1 Research
Produce entry-level health service psychologists who generate research that contributes to the professional knowledge base and/or evaluates the effectiveness of various professional activities.

#### 3.1A Scientific Mindedness
Consistent with the scientist-practitioner model, interns will apply scientific methods of evaluating practices, interventions, and programs.

#### 3.1B Evidence-Based Practice
Interns will critically review relevant research literature to inform practice, to inform knowledge of evidence-base for interventions and assessment, and assessment of outcomes of interventions.

### Aim 4. Professional Conduct: To prepare entry-level health service psychologists with the communication and interpersonal skills necessary for effective collaboration with others as peers and as supervisors in the delivery of services to individuals, groups, and systems.

#### 4.1 Communication and interpersonal skills
Produce entry-level health service psychologists who use their communication and interpersonal skills to foster their assessment, intervention, and consultation activities.

#### 4.1A Interpersonal Skills
Interns will develop and maintain effective relationships with a wide range of clients, colleagues, organizations and communities.

#### 4.1B Expressive Skills
Interns will demonstrate verbal and written communications that are informative, succinct, organized, and well-integrated; nonverbal communications will be appropriate and well-aligned with the context.

#### 4.2 Supervision
Produce entry-level health service psychologists with the professional knowledge base of enhancing and monitoring the professional functioning of others.

#### 4.2A Processes and Procedures
Interns will demonstrate knowledge of supervision models and practices and effectively addresses limits of competency to supervise.
Internship Program
Match Number: 2447

Intern Selection

Intern Recruitment
Due to the consortium trainers’ commitment to attracting interns with diverse backgrounds, intern recruitment emphasizes obtaining an applicant pool that is highly reflective of diversity.

Given that the consortium is affiliated with Michigan State University, the MMPIC program adheres to the university’s equal opportunity statement:

*MicIns*State University is committed to the principles of equal opportunity, non-discrimination and affirmative action. University programs, activities and facilities are available to all without regard to race, color, gender, religion, national origin, political persuasion, sexual orientation, marital status, disability, height, weight, veteran status, age or familial status. The University is an Affirmative Action, Equal Opportunity Employer.

Beyond providing equal opportunity, we seek candidates with diverse experiences. We are committed to ensuring a range of diversity among our interns, and we select candidates representing different geographic areas, ages, racial and ethnic backgrounds, sexual orientations, disabilities, and life experiences. All things being equal, consideration is given to applicants who identify themselves as members of historically underrepresented groups on the basis of racial or ethnic status, as representing diversity on the basis of sexual orientation, or as representing diversity on the basis of disability status. Such applicants are given preference in ranking in comparison to comparatively qualified applicants who are not members of historically underrepresented groups.
Internship Program  
Match Number: 2447

Practica and Academic Preparation Requirements

- **Academic Record**: Interns must be in good standing with their APA-accredited doctoral program. Interns must hold at least an M.A. degree.
- **Clinical Experience**: Interns must have sufficient practicum experience working with a school-age population demonstrating adequate competency across all MMPIC aims. Interns must have at least 150 hours of assessment experience and 150 hours of intervention/consultation experience.
  - Applicants interested in the Ingham ISD and Saginaw Public Schools placement must be eligible to obtain the Michigan Preliminary School Psychologist Certificate. Per the state of Michigan, the following requirements apply: (a) hold a graduate degree in an approved school psychology certification program with no less than 45 semester credit hours, (b) have completed supervised internship of a minimum of 600 clock-hours in school psychology, and (c) possess a valid out-of-state school psychologist certificate or license if the school psychologist program was completed in another state. Visit the Michigan Department of Education (link: bit.ly/2fXtLjL) website for more information.
  - Applicants for all other placements must be eligible to obtain their Master’s Educational Limited License in Psychology (TLLP). Criteria and procedures for application are found on the Michigan Board of Psychology website (link: bit.ly/2fFhC2w).
  - **Students from in-state doctoral programs should refer to their program guidelines for obtaining these credentials.**
- **Scholarship**: Consistent with the scientist-scholar-practitioner model, interns must successfully complete their doctoral dissertation proposal prior to the internship interview.
- **Writing Skills**: Interns must demonstrate strong writing skills in application materials. Applicants must submit one assessment report and one other professional write-up (consultation report, therapy report, intervention progress report) with their application.
- **Letters of Recommendation**: Interns must have three letters of recommendation aligned with the scientist-scholar-practitioner model of training. One of these letters must be from the Doctoral Program’s Director of Clinical Training.
- **Interpersonal and Communication Skills**: MMPIC seeks interns who are flexible, collaborative, independent, mature, and open to feedback and supervision. Applicants who are interested in culturally competent practice or speak a second language are prioritized.

Selection Process

At least two trainers review each application. Trainers seek applicants who have a sound clinical and scientific knowledge base from their academic program, strong basic skills in assessment, intervention, and consultation, and the personal characteristics necessary to function well in our internship setting. Our selection criteria are based on a “goodness of fit” with our scientist-practitioner-scholar model, and we look for interns whose training goals match the training we offer. We prefer interns from university-based programs but consider candidates from free-standing programs as well. **Note**: The selection process may include information gained from internet searches of applicants’ names.
Interview Process

In-person interviews are required of all applicants who make the final selection round. In-person interviews are arranged with individual sites and typically involve at least two interviews with training staff and a brief tour of at least one facility. One of the interviews involves discussing a clinical vignette presented by staff.

Application Procedures

MMPIC is not yet a member of the Association of Psychology Postdoctoral and Internship Centers (APPIC). We are, however, have been a part of the APPIC match since 2017-2018. Over the years, APPIC has developed procedures for student-internship matching, and these guidelines continue to evolve over time as APPIC remains responsive to the varied concerns around this issue. The guidelines in effect for a given application year are available from the APPIC website (link: www.appic.org/Match/Match-Policies). MMPIC agrees to follow APPIC guidelines and agrees to abide by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant.

MMPIC will participate in the APPIC Internship Matching Program administered by National Matching Services Inc. (NMS). Applicants must complete the APPIC Application for Psychology Internship (AAPI) online (www.appic.org/AAPI). Each site has a separate Match number (below), which applicants must use to apply for and rank each consortium site individually:

- Ingham Intermediate School District (offering 1 position): 244712
- Psychology Internship in Integrated Behavioral Health and Pediatric Psychology, Michigan Medicine - Department of Pediatrics and Communicable Diseases, Division of Pediatric Psychology (offering 2 positions): 244714
- Saginaw Public Schools (offering 2 positions): 244711
- Sunfield Center for Autism, ADHD, and Behavioral Health (offering 1 position): 244713
- Thriving Minds Behavioral Health Center (offering 1 position): 244715

Cover Letter

Applicants may apply to and rank all five sites, though it is strongly recommended students carefully consider which site or sites best align with their training, experience, and career goals. Applicants must write separate cover letters for each site to which they are applying. Please keep each cover letter to two single-spaced pages or less. Within the first line of the cover letter, applicants should specify to which consortium site the letter is directed (e.g., “I am applying to the Sunfield Center” or “I am interested in a placement at Ingham ISD”). Applicants may identify themselves as representing an element of racial or cultural diversity, though these statements should be separated from the formal body of the cover letter.

Application Deadline

All application materials must be submitted through the AAPI Online Service and received by December 1st each year. No materials will be accepted by e-mail or US mail.
Individual Site Descriptions

Ingham Intermediate School District (Mason, MI) - 244712

Ingham Intermediate School District (ISD) is a regional education service agency in Mid-Michigan. Ingham ISD provides services to over 44,000 students. The service area extends into seven counties; however, the district primarily serves the schools in Ingham County. Ingham ISD’s main campus is in Mason, but many of the 350 staff members work directly in local schools and in community settings. Ingham ISD serves a diverse population. The district includes an urban core and ranges from small rural communities to affluent suburban schools. Over 40% of the students in Ingham ISD are from racially and ethnically diverse backgrounds. Approximately 45% of the students served by Ingham ISD qualify for free or reduced meals. Approximately 13% of students receive special education services.

Ingham Intermediate School District serves children and adults from birth to age 26. Interns provide services and supports to students qualifying for special education services within various eligibility categories, including cognitive impairment, emotional impairment, speech and language impairment, early childhood developmental delay, specific learning disability, severe multiple impairment, and autism spectrum disorder. The district includes several specialized programs including Great Parents/Great Start, Early On programs, an Autism Spectrum Disorder program, the Capital Area Career Center, the Evergreen school for youth with significant emotional or behavioral differences, the Heartwood school for youth with significant impairments, and two residential schools.

The ISD provides direct and indirect academic, behavioral, and social-emotional services through a Multi-Tiered System of Support (MTSS) framework. School psychology interns will spend approximately half of their time providing assessment, intervention, and consultation services at the local building-level. The other half of their time, and during the summer, interns will engage in systems-level assessment, intervention, and consultation to support ISD-wide MTSS implementation. The staff at Ingham ISD includes a doctoral level, licensed psychologist who is on-site at least twenty hours per week and who provides individual supervision for interns for at least two hours per week. Specifically, the training co-director, Dr. Barrett, is on staff and will supervise an intern.

Intern training is a priority for Ingham ISD in order to develop the assessment, intervention, and consultation skills of potential school psychologists. As the ISD deepens the implementation of MTSS and school psychologists shift roles from special education decision making to providing direct and indirect services, interns trained locally in the development of these skills will be critical to the success of individual students and systems.

The internship stipend for Ingham ISD is $23,000. Applicants seeking placement at Ingham Intermediate School District must be eligible to obtain the Michigan Preliminary School Psychologist Certificate. Site Primary Supervisor: Courtenay Barrett, PhD, NCSP
Psychology Internship in Integrated Behavioral Health and Pediatric Psychology, housed in Michigan Medicine, Department of Pediatrics and Communicable Diseases, Division of Pediatric Psychology (Ann Arbor, MI) - 244714

The Division of Pediatric Psychology is a program within the Department of Pediatrics at the C.S. Mott Children's Hospital within the University of Michigan Health System. The program is composed of psychologists who are integrated within medical teams to maximize the overall health of children and their families using principles of behavioral science.

The Division has three primary missions: clinical care, research, and education. The Division of Pediatric Psychology provides comprehensive evaluation and treatment for children and adolescents who have problems with growth, development, behavior, or adaptation to illness.

The research mission of the Division is to advance knowledge of the interplay between development, behavior, and health. Faculty within the Division of Pediatric Psychology are engaged in innovative and collaborative clinical and health services research programs. Current research programs are related to eating/feeding behavior, obesity, sleep disorders, integrative behavioral health, adherence to chronic illness treatment regimens, transition from pediatric to adult centered care, and health-related quality of life.

The teaching mission of the Division encompasses undergraduate students, medical students, pediatric and family medicine residents, pre-doctoral psychology trainees, post-doctoral psychology fellows, and practicing pediatricians. The team includes many doctoral-level, licensed psychologists. The site supervisor, Dr. Lancaster, is a licensed psychologist who is on-site at least twenty hours per week. Dr. Lancaster provides at least two hours of individual supervision to each intern every week. Professional teaching occurs in clinical settings, in the classroom, and within the context of research. The Division is also committed to the education of patients, families, and members of the community.

The internship stipend for the Psychology Internship in Integrated Behavioral Health and Pediatric Psychology is $20,000. Interns for the Psychology Internship in Integrated Behavioral Health and Pediatric Psychology must be eligible to receive their Temporary Limited License in the State of Michigan for the internship year.

Site Primary Supervisor: Blake Lancaster, Ph.D.
**Saginaw Public Schools (Saginaw, MI) – 244711**

Saginaw Public Schools is a culturally diverse, urban school district. The district serves many children and families with low socio-economic status and high and low incidence disabilities. Saginaw Public Schools educates approximately 7,500 students in 10 elementary schools, 1 middle school, and 3 high schools. Interns gain experience in evaluation and consultation, empirically-supported individual and/or group therapy and intervention, and crisis intervention to support children and adolescents with a variety of needs. Clients present with a variety of needs including specific learning disabilities, developmental disabilities, physical disabilities, mood disorders, or serious mental illness. The U.S. Census data from 2016 reports the following racial/ethnic demographics for Saginaw County, Michigan: White (76.4%), Black/African American (19.4%), Hispanic/Latino (8.4%), Asian (1.4%), Multiracial (2.2%), American Indian/Alaska Native (0.6%), Native Hawaiian/Other Pacific Islander (0.1%).

At Saginaw Public Schools, the training philosophy includes the provision of comprehensive psychological services, collaboration with healthcare facilities, advocacy for inclusion and numerous specialized programs, and the provision of a multi-tiered system of supports. Interns engage in the following training activities: evaluation (approximately 40% of work time), consultation (30%), behavior management (20%), crisis intervention (5%), and research/program evaluation (5%). The internship emphasizes doctoral-level school psychology, with exposure to the integration of neuropsychology in the schools. Interns also have the opportunity to complete a mini-rotation in Central Michigan University’s Approved Autism Evaluation Center. Interns in this mini-rotation will serve as a member of a multidisciplinary evaluation team with the client's pediatrician and speech-language pathologist. During the summer, interns continue to accrue clinical hours by working at the Central Autism Assessment & Treatment (CAAT) Center, affiliated with CMU. The CAAT is a multidisciplinary student training center that provides comprehensive, evidence-based assessment and treatment for children and adolescents with autism spectrum disorders. The staff at Saginaw Public Schools includes a doctoral level, licensed psychologist who is on-site at least twenty hours per week and who provides individual supervision to each intern for at least two hours per week.

The internship stipend for placement in Saginaw Public Schools is $22,500. *Applicants seeking placement at Saginaw Public Schools must be eligible to obtain the Michigan Preliminary School Psychologist Certificate.*

Sunfield Center for Autism, ADHD, and Behavioral Health (Ann Arbor, MI) - 244713

The Sunfield Center for Autism, ADHD, and Behavioral Health (Sunfield Center) is an outpatient mental health center specializing in treatment of child, adolescent, and adult psychiatric disorders in Ann Arbor, Michigan. Sunfield Center was founded in August 2011 by psychologists from the former University of Michigan Autism and Communication Disorders Center (UMACC).

At Sunfield Center, a team of highly qualified professionals deliver evidence-based and research-informed evaluations and treatments within a cognitive behavioral therapy framework. Sunfield trainers are dedicated to increasing awareness of childhood mental health needs, as well as providing patients and their families stability, trust, education, and ongoing support. The staff includes a doctoral level, licensed psychologist who is on-site at least twenty hours per week and who provides individual supervision for interns for at least two hours per week.

All Sunfield staff are trained in the delivery of state-of-the-art assessments and treatments of individuals across the lifespan (from toddlers to adults) presenting with an Autism Spectrum Disorder (ASD). Sunfield trainers also specialize in diagnostic assessment and treatment of Attention Deficit/Hyperactivity (ADHD) and Disruptive Behavior Disorders, as well as Anxiety Disorders in children and adolescents. The Sunfield Center provides assessment services, CBT, parent training, and school-based consultation services. The Center also offers certified training on the Autism Diagnostic Observation Schedule, Second Edition, the Autism Diagnostic Interview-Revised, and Parent Child Interaction Training.

The internship stipend for the Sunfield Center is $20,000. Interns at Sunfield must be eligible to receive their Temporary Limited License in the State of Michigan for the internship year.

Thriving Minds Behavioral Health Center (Brighton, MI) - 244715

Thriving Minds Behavioral Health Center (Thriving Minds) is an independent clinic specializing in the evaluation and treatment of anxiety, learning, and behavioral disorders. The clinic has two locations; the original clinic is located in Brighton and a second branch in Chelsea. The intern will work out of the Brighton clinic. The clinic has central leadership and consistent procedures across the two locations.

Thriving Minds serves children and youth and their families using a Cognitive Behavioral Therapy (CBT) framework. Within that framework, the clinicians provide CBT for mood and anxiety disorders and Parent Child Interaction Therapy (PCIT) for disruptive behavior disorders. The clinic also offers psychological assessments for learning issues, anxiety, Autism Spectrum Disorders, and Attention-Deficit/Hyperactivity Disorder. The clinic also serves as a local, national, and international resource on the treatment of Selective Mutism. Specific services and programs offered by the practice include the Peer Connect group, the Confident Kids summer camp, individual anxiety interventions, individual, family, or parent support sessions, and intensive, school-based intervention and consultation.

Thriving Minds is a multi-location clinic providing a team-based interdisciplinary experience. The clinic includes four Licensed Psychologists, two Licensed Social Workers, and nine clinicians with Limited or Temporary Limited Licenses in Psychology. Thriving Minds also helps to train developing practicum students. The team frequently consults with school-based and medical professionals in supporting clients. The staff at Thriving Minds includes a doctoral level, licensed psychologist who is on-site at least twenty hours per week and who provides individual supervision for interns for at least two hours per week.

Intern training is essential for Thriving Minds. The clinic values the diversity of perspectives interns contribute as well as their passion and enthusiasm for the field. Thriving Minds also seeks to share knowledge about Selective Mutism and how parents and educators can help children move through this set of thoughts, feelings, and behaviors.

The internship stipend for Thriving Minds is $20,000. Interns at Thriving Minds must be eligible to receive their Temporary Limited License in the State of Michigan for the internship year.
